Senior IT Leader | Project & Program Manager (PMP) | Enterprise Architecture (TOGAF) | Digital Transformation Strategist

---

PROFESSIONAL SUMMARY

Results-driven IT leader and PMP-certified Project Manager with 20+ years of experience steering large-scale digital transformation programs, enterprise modernization, and cross-functional team leadership. Proven ability to bridge the gap between C-suite strategy and technical execution — turning complex, legacy-laden environments into scalable, high-performance platforms.

Currently driving government process automation at EY and pursuing TOGAF Foundation certification to deepen enterprise architecture expertise. Track record of managing end-to-end project lifecycles, building high-performing teams, and delivering measurable business outcomes: 8× throughput gains, sub-200ms response times, and zero-downtime migrations.

Seeking senior leadership roles — Project/Program Manager, Enterprise Architect, or Head of IT — where I can apply my blend of strategic vision, architectural thinking, and hands-on delivery experience to drive organizational transformation at scale.

CORE COMPETENCIES

Project & Program Management	Enterprise Architecture (TOGAF)	Digital Transformation Strategy
Agile / Scrum Delivery	Stakeholder & Executive Engagement	Risk & Issue Management
Team Building & Leadership	Budgeting & Resource Planning	Vendor & Contract Management
Legacy System Modernization	Cloud & Hybrid Architecture	Business Process Re-engineering
CI/CD & DevOps Practices	Requirements Analysis (BRD/FRD)	Change Management

TECHNICAL PROFICIENCIES

Platforms & Infrastructure: Microsoft Azure, Cloud & Hybrid Architectures, SQL Server (Always On), Redis, Memcache, MQ

Development: C# .NET, ASP.NET, RESTful APIs, Python (Django, Data Science), PHP (Laravel, CodeIgniter)

Project Delivery: Agile-Scrum, Sprint Planning, CI/CD Pipelines, SDLC, UAT

Tools & Frameworks: Git, Jira, Microsoft Project, ERP Systems, Applied AI

PROFESSIONAL EXPERIENCE

Project Manager | Government Process Automation

Feb 2025 – Present

EY, Amman, Jordan

Client: Saudi Expro – Services Efficiency Review Department

Leading the end-to-end digital transformation of a government agency's manual workflows, replacing fragmented legacy systems with a centralized, scalable platform. Managing a cross-functional team of 5 and reporting directly to client executives.

- Drove full project life-cycle from initiation through UAT, applying Agile-Scrum methodology with 2-week sprint cycles to deliver on time and within budget.

- Authored all key project artifacts — Business Requirements Document (BRD), user stories, interface mock-ups, and user manuals — ensuring traceability from requirements to delivered functionality.
- Digitized core business processes, eliminating spreadsheet/email-based workflows and establishing an automated system that improved data integrity and operational efficiency.
- Facilitated stakeholder workshops and weekly executive sprint reviews, securing formal client sign-off on all major deliverables.
- Maintained project health through proactive risk register management, sprint velocity tracking, and continuous alignment with budgetary and schedule baselines.

Development Team Lead | Technical Architect 2021 – 2024

MStart, Amman, Jordan

Recruited to lead the technical overhaul of a high-traffic e-commerce platform, owning both team leadership and solution architecture. Built and managed dual-stream backend and mobile teams while driving a legacy-to-modern platform migration.

- Scaled platform capacity from 15,000 to 120,000 daily orders (8× increase) while reducing response times from 3s to 200ms — directly enabling business revenue growth.
- Built and led a cross-functional team (Backend + Mobile), owning recruitment, onboarding, daily stand-ups, and blocker resolution to maintain sprint velocity.
- Architected SQL Server "Always On" high-availability solution, achieving zero-downtime during full platform migration.
- Established CI/CD pipelines that streamlined release cycles and reduced deployment risk.
- Directed the migration to a modern Android application, significantly reducing bug reports and improving end-user experience.
- Balanced hands-on technical delivery (C#, SQL) with people management and stakeholder communication.

Senior Systems Developer 2018 – 2021

MStart, Amman, Jordan

C# .NET, RESTful APIs, SQL Server, Redis, Memcache, MQ Services

Led task allocation and issue resolution across the development team while driving architectural improvements to core platform services.

- Re-architected SOAP services into lightweight RESTful APIs, improving maintainability and enabling the platform to process 200,000+ transactions per day — a 400% increase in sales throughput.
- Diagnosed and resolved critical performance bottlenecks (deadlocks, timeouts) achieving millisecond-level transaction improvements and enabling horizontal scale-out of applications and databases.
- Designed and implemented optimized stored procedures and user-defined data types to support high-volume transactional workloads.

Software Development Consultant 2017 – Present

Kafou Services, Jordan

C# ASP.NET, Python Django, PHP Laravel/CodeIgniter, SQL Server, MySQL, Scikit-Learn, Twilio SDK

Provide ongoing technical consulting across multiple concurrent projects, overseeing architecture decisions, development standards, and delivery timelines.

- Led machine learning research initiatives using Python and Scikit-Learn for predictive analytics.
- Architected two-way data synchronization solution using Python Django, Python Signals, and MySQL.
- Delivered "ComplianceArch" web application (C# ASP.NET, SQL Server) for regulatory compliance management.
- Managed end-to-end delivery of Kafou backend services and admin panel (PHP CodeIgniter, MySQL).
- Designed Wayt platform API with online payment integration (PayFort), real-time messaging (PubNub), and geolocation (Google Maps).
- Implemented peer-to-peer and group video calling solution using PHP Laravel, MySQL, and Twilio SDK.

ERP Implementation Specialist 2013 – 2017

Mahmoud Saleh Abbar, Jeddah, Saudi Arabia

SQL Server, .NET Applications, ERP Systems

Led a company-wide ERP implementation across 5 cities and 450+ employees, while developing supporting .NET applications for management reporting.

- Drove enterprise-wide ERP rollout, coordinating across multiple locations and stakeholder groups to ensure adoption and data migration integrity.
- Automated back-office functions spanning technology, services, and human resources — streamlining business processes across the organization.
- Designed and implemented advanced T-SQL stored procedures to produce data pipelines for statistics, finance, and auditing.

Senior Full Stack Developer 2010 – 2013

Grant Thornton ME, Amman, Jordan

C# .NET, ASP.NET, SQL Server, JavaScript, Telerik

Owned development and delivery of large-scale .NET applications deployed across the Middle East region.

- Led the implementation of enterprise .NET applications across multiple countries in the Middle East.
- Drove development of new application modules, managing requirements gathering through deployment and user training.

Senior Full Stack Developer 2005 – 2010

Grant Thornton, Jeddah, Saudi Arabia

C# .NET, ASP.NET, SQL Server, JavaScript, Telerik

Managed a development team of 2, coordinating with Grant Thornton SA and CGC UK leadership. Owned client relationship management, technical delivery, and cross-border collaboration with frequent travel to the UK.

- Led development of an in-house software product that was successfully deployed at 25+ banks and financial institutions across the region — demonstrating product management and scaled delivery capability.

Additional experience as Full Stack Developer at Visual Soft, Jubail, Saudi Arabia

EDUCATION

Bachelor's Degree in Business Administration

Applied Science University, Amman, Jordan

PROFESSIONAL CERTIFICATIONS

Project Management Professional (PMP®) | Project Management Institute (PMI)	March 2026 – March 2029
TOGAF Foundation (Level 1)	In Progress
Microsoft Certified: Azure Fundamentals (AZ-900) | Microsoft	November 2025
EY Applied AI – Bronze Learning | EY	March 2025
Building Business Acumen | EY	March 2026
Developing Client Relationships | EY	March 2026
Applied Data Science with Python – Level 2 | IBM	2017
Python for Data Science | IBM	2017
Advanced Certified Operational Risk Executive (CORE2) | Aldar Audit Bureau / Grant Thornton	2010
Certified Operational Risk Executive (CORE) | Aldar Audit Bureau / Grant Thornton	April 2007
