Senior IT Leader | Project & Program Manager (PMP) | Enterprise Architecture (TOGAF) | Digital Transformation Strategist

---

PROFESSIONAL SUMMARY

Results-driven IT leader and PMP-certified Project Manager with 20+ years of experience steering large-scale digital transformation programs, enterprise modernization, and cross-functional team leadership. Proven ability to bridge the gap between C-suite strategy and technical execution — turning complex, legacy-laden environments into scalable, high-performance platforms.

Currently driving government process automation at EY and pursuing TOGAF Foundation certification to deepen enterprise architecture expertise. Track record of managing end-to-end project lifecycles, building high-performing teams, and delivering measurable business outcomes: 8× throughput gains, sub-200ms response times, and zero-downtime migrations.

Seeking senior leadership roles — Project/Program Manager, Enterprise Architect, or Head of IT — where I can apply my blend of strategic vision, architectural thinking, and hands-on delivery experience to drive organizational transformation at scale.

CORE COMPETENCIES

Project & Program Management	Enterprise Architecture (TOGAF)	Digital Transformation Strategy
Agile / Scrum Delivery	Stakeholder & Executive Engagement	Risk & Issue Management
Team Building & Leadership	Budgeting & Resource Planning	Vendor & Contract Management
Legacy System Modernization	Cloud & Hybrid Architecture	Business Process Re-engineering
CI/CD & DevOps Practices	Requirements Analysis (BRD/FRD)	Change Management

TECHNICAL PROFICIENCIES

Platforms & Infrastructure: Microsoft Azure, Cloud & Hybrid Architectures, SQL Server (Always On), Redis, Memcache, MQ

Development: C# .NET, ASP.NET, RESTful APIs, Python (Django, Data Science), PHP (Laravel, CodeIgniter)

Project Delivery: Agile-Scrum, Sprint Planning, CI/CD Pipelines, SDLC, UAT

Tools & Frameworks: Git, Jira, Microsoft Project, ERP Systems, Applied AI

PROFESSIONAL EXPERIENCE

Project Manager | Government Process Automation — Feb 2025 – Present

EY, Amman, Jordan

Client: Saudi Expro – Services Efficiency Review Department

Leading the end-to-end digital transformation of a government agency's manual workflows, replacing fragmented legacy systems with a centralized, scalable platform. Managing a cross-functional team of 5 and reporting directly to client executives.

- Drove full project life-cycle from initiation through UAT, applying Agile-Scrum methodology with 2-week sprint cycles to deliver on time and within budget.

- Authored all key project artifacts — Business Requirements Document (BRD), user stories, interface mock-ups, and user manuals — ensuring traceability from requirements to delivered functionality.
- Digitized core business processes, eliminating spreadsheet/email-based workflows and establishing an automated system that improved data integrity and operational efficiency.
- Facilitated stakeholder workshops and weekly executive sprint reviews, securing formal client sign-off on all major deliverables.
- Maintained project health through proactive risk register management, sprint velocity tracking, and continuous alignment with budgetary and schedule baselines.

Senior Development Team Lead | Project Lead 2018 – 2024

MStart, Amman, Jordan

Recruited to lead the technical overhaul of a high-traffic e-commerce platform, owning both team leadership and solution architecture. Built and managed dual-stream backend and mobile teams while driving a legacy-to-modern platform migration.

- Scaled platform capacity from 15,000 to 120,000 daily orders (8× increase) while reducing response times from 3s to 200ms — directly enabling business revenue growth.
- Built and led a cross-functional team (Backend + Mobile), owning recruitment, onboarding, daily stand-ups, and blocker resolution to maintain sprint velocity.
- Architected SQL Server "Always On" high-availability solution, achieving zero-downtime during full platform migration.
- Established CI/CD pipelines that streamlined release cycles and reduced deployment risk.
- Directed the migration to a modern Android application, significantly reducing bug reports and improving end-user experience.
- Balanced hands-on technical delivery (C#, SQL) with people management and stakeholder communication.

Software Development Consultant 2017 – 2020

Kafou Services, Jordan

C# ASP.NET, Python Django, PHP Laravel/CodeIgniter, SQL Server, MySQL, Scikit-Learn, Twilio SDK

Provide ongoing technical consulting across multiple concurrent projects, overseeing architecture decisions, development standards, and delivery timelines.

- Led machine learning research initiatives using Python and Scikit-Learn for predictive analytics.
- Architected two-way data synchronization solution using Python Django, Python Signals, and MySQL.
- Delivered "ComplianceArch" web application (C# ASP.NET, SQL Server) for regulatory compliance management.
- Managed end-to-end delivery of Kafou backend services and admin panel (PHP CodeIgniter, MySQL).
- Designed Wayt platform API with online payment integration (PayFort), real-time messaging (PubNub), and geolocation (Google Maps).
- Implemented peer-to-peer and group video calling solution using PHP Laravel, MySQL, and Twilio SDK.

ERP Implementation Specialist 2013 – 2017

Mahmoud Saleh Abbar, Jeddah, Saudi Arabia

SQL Server, .NET Applications, ERP Systems

Led a company-wide ERP implementation across 5 cities and 450+ employees, while developing supporting .NET applications for management reporting.

- Drove enterprise-wide ERP rollout, coordinating across multiple locations and stakeholder groups to ensure adoption and data migration integrity.
- Automated back-office functions spanning technology, services, and human resources — streamlining business processes across the organization.
- Designed and implemented advanced T-SQL stored procedures to produce data pipelines for statistics, finance, and auditing.

Senior Full Stack Developer 2010 – 2013

Grant Thornton ME, Amman, Jordan

C# .NET, ASP.NET, SQL Server, JavaScript, Telerik

Owned development and delivery of large-scale .NET applications deployed across the Middle East region.

- Led the implementation of enterprise .NET applications across multiple countries in the Middle East.
- Drove development of new application modules, managing requirements gathering through deployment and user training.

Senior Full Stack Developer 2005 – 2010

Grant Thornton, Jeddah, Saudi Arabia

C# .NET, ASP.NET, SQL Server, JavaScript, Telerik

Managed a development team of 2, coordinating with Grant Thornton SA and CGC UK leadership. Owned client relationship management, technical delivery, and cross-border collaboration with frequent travel to the UK.

- Led development of an in-house software product that was successfully deployed at 25+ banks and financial institutions across the region — demonstrating product management and scaled delivery capability.

Additional experience as Full Stack Developer at Visual Soft, Jubail, Saudi Arabia

EDUCATION

Bachelor's Degree in Business Administration

Applied Science University, Amman, Jordan
