Senior Technical Program Manager | Technical Delivery Director

PROFESSIONAL SUMMARY

PMP certified IT leader with 20 years of experience directing digital transformation programs and cross functional delivery teams, bridging the gap between C-suite vision and technical execution, and transforming legacy infrastructure into scalable cloud environments, proven track record steering multi-million dollar government and enterprise portfolios.

CORE COMPETENCIES

Project & Program Management	Enterprise Architecture (TOGAF)	Digital Transformation Strategy
Agile / Scrum Delivery	Stakeholder & Executive Engagement	Risk & Issue Management
Team Building & Leadership	Budgeting & Resource Planning	Vendor & Contract Management
Legacy System Modernization	Cloud & Hybrid Architecture	Business Process Re-engineering
CI/CD & DevOps Practices	Requirements Analysis (BRD/FRD)	Change Management

TECHNICAL PROFICIENCY

Cloud & Infrastructure: Microsoft Azure, Cloud & Hybrid Architectures, SQL Server (Always On), Redis High Availability.
Enterprise Solutions & Tools: Jira, Microsoft Project, Confluence, Enterprise ERP Data Pipelines.
Modern Software Frameworks (Conceptual): C# .NET Core, Microservices, RESTful APIs, Python (Data Science, Applied AI).
Tools & Frameworks: Git, Jira, Microsoft Project, ERP Systems, Applied AI

PROFESSIONAL EXPERIENCE

Project Manager | Government Process Automation

Feb 2025 – Present

EY, Amman, Jordan

Client: Saudi Expro – Services Efficiency Review Department

Directing the end-to-end digital transformation of a government agency's manual workflows, replacing fragmented legacy systems with a centralized, scalable platform. Managing a cross-functional team of 5 and reporting directly to client executives.

- Drove full project life-cycle from initiation through UAT, applying Agile-Scrum methodology with 2-week sprint cycles to deliver on time and within budget.
- Conducted stakeholder alignment workshops to map out complex enterprise architecture requirements, turning high-level business needs into actionable technical execution road-maps
- Authored all key project artifacts — Business Requirements Document (BRD), user stories, interface mock-ups, and user manuals — ensuring traceability from requirements to delivered functionality.
- Digitized core business processes, eliminating spreadsheet/email-based workflows and establishing an automated system that improved data integrity and operational efficiency.
- Facilitated stakeholder workshops and weekly executive sprint reviews, securing formal client sign-off on all major deliverables.

Technical Delivery Manager / Team Lead

2018 – 2024

MStart, Amman, Jordan

- **Directed the end-to-end technical delivery** and legacy-to-modern platform migration for a high-traffic e-commerce ecosystem generating 1 Billion SAR annual revenue.
- **Directed dual-stream cross-functional engineering teams** (Backend & Mobile), driving recruitment, on-boarding, resource allocation, and daily Agile-Scrum activities to optimize team velocity.
- **Enterprise-grade infrastructure delivery:** Led a platform overhaul that scaled capacity from 15,000 to 120,000 daily orders (an 8x increase) while driving system latency down from 3s to sub-200ms, directly unlocking corporate revenue growth.
- **Mitigated critical deployment risks** by designing a high-availability SQL Server "Always On" solution (99.9% up-time), executing a complex database cut-over with zero downtime.
- **Enhanced engineering delivery practices** by establishing automated CI/CD pipelines, slashing release cycle delays, and significantly lowering deployment-day risks.
- **Governed third-party vendor integrations and stakeholder communications**, bridging the gap between deep systems architecture execution and executive business priorities.

Co-Founder & Head of Technical Delivery (CTO)

2017 – 2020

Kafou Services, Jordan

- **Led the technical road-map, product delivery strategy, and launch** for an on-demand, two-sided mobile marketplace platform connecting end-users with local service providers.
- **Directed the end-to-end development life cycle (SDLC)** for the core marketplace product, coordinating cross-functional engineering efforts across backend services, mobile apps, and admin panels.
- **Directed system integrations**, governing the deployment of online payment gateways (PayFort), real-time messaging protocols (PubNub), and geolocation mapping APIs (Google Maps).

ERP Implementation & Financial Data Governance Specialist

2013 – 2017

Mahmoud Saleh Abbar, Jeddah, Saudi Arabia

- **Appointed directly by the CFO** to oversee financial data integrity and lead a company-wide ERP rollout across 5 cities and 450+ employees.
- **Governed enterprise data cleansing and migration strategy**, consolidating fragmented retail transaction data across dozens of nationwide retail branches into a single, trusted source of truth.
- **Designed and engineered advanced T-SQL financial data pipelines**, automating back-office reporting workflows spanning technology, services, and human resources.
- **Delivered critical Business Intelligence (BI) and management reporting systems** that provided the C-suite with accurate, real-time visibility into corporate statistics, compliance, and financial auditing.

Product Delivery Manager & Lead Enterprise Architect

2010 – 2013

Grant Thornton, Saudi Arabia

- **Directed the end-to-end product lifecycle and modernization strategy** for an enterprise Operational Risk Management (ORM) platform, transforming a legacy single-user system into a scalable, multi-tenant web architecture.
- **Served as the sole Architect and Lead Developer** to design and engineer a highly secure, multilingual ASP.NET enterprise platform tailored for regulated financial environments.
- **Drove exceptional commercial growth:** led the platform release as **Product Owner**, directly accelerating client acquisition from 5 to 40+ premier banks and insurance companies across the EMEA region.
- **Governed regional technical delivery and Tier-3 client support**, establishing strong stakeholder relationships with C-level client executives and collaborating cross-border with Grant Thornton SA and CGC UK leadership teams.

Additional experience as Full Stack Developer at Visual Soft, Jubail, Saudi Arabia

EDUCATION

Bachelor's Degree in Business Administration

Applied Science University, Amman, Jordan
